

PC 850

Automatic Audiometer

- Pro-active PC-based automatic audiometer
- Bekesy test function
- Test results analysis
- User definable recall facility
- Identification of "at risk" personnel
- In-depth management analysis
- Patient communication facility
- Extremely portable (weighs just 715g)

The **Amplivox PC850** is an automatic audiometer that integrates with a PC to provide a comprehensive and pro-active audiometric facility.

Comprehensive

Three extensive tests including the Bekesy test and an on-screen audiometric questionnaire facilitate a completely paper-less audiometric function. All tests can be reviewed on-screen and subsequently printed or electronically exported if required.

Pro-active

The **Amplivox PC850** has a user definable recall facility and extensive data analysis features that enable "at risk" individuals and user defined groups to be identified and monitored.

Portability

With a unit weight of just 715g, the **Amplivox PC850** can be transferred from location to location with ease.

The **Amplivox PC850** is a cost effective solution for the provision, storage and management analysis of audiometric test results.
